

REVOLUTIONARY GOVERNMENT OF ZANZIBAR

OFFICE OF CHIEF GOVERNMENT STATISTICIAN

## Quarterly National Accounts Release

Third Quarter (July – Sept), 2013

OFFICE OF CHIEF GOVERNMENT STATISTICIAN

ZANZIBAR.

Dec 2013

## **Forward.**

This Third Quarter report presents the analysis of Quarterly National Accounts (QNA) estimate in summary form. Brief description of estimation of GDP on Agriculture, Fishing, Industry, Services, Whole Sale and Retail Trade, Hotel and Restaurants, Transport and Communication, Financial Intermediation, Public Administration, Education, Other services and Taxes and Subsidies has been presented.

The Quarterly National Accounts provide the quarterly estimation of Gross Domestic Product (GDP) at constant prices for each economic activity which can serve a wider range of purposes. These time series results are essential for planning on the economy development, monitoring and evaluation of sound economic programs on a short term basis.

The National Accounts form a comprehensive framework within which economic and social data can be presented in a coherent, consistent manner. In the mean time, the estimates of National Accounts of Zanzibar developed into quarterly series and cover the period of 2001 to third quarter of 2013.

The Office of Chief Government Statistician (OCGS) in collaboration with various line Ministries engage on data collection process as well as compilation. It is our belief that the quarterly estimation of GDP is necessary input which enabling to put in places the environment for national development and improves the ability of government to formulate appropriate policies, manage the economic and social development process and monitor improvements of the living standards of the people.

The Office of Chief Government Statistician invite comments and suggestions for improvement on the report and enter process of quarterly GDP estimates, and should be send to the address below.

## **Acknowledgments**

The need for Quarterly National Accounts (QNA) has gained high priority in recent years with the broad objective of measuring the short-term economic performance. This report is the third series of the QNA estimates released by the OCGS for the year 2013. The comprehensive set of national accounts tables are given by the industrial economic activities as recommended by the 1993 System of National Accounts (SNA – 1993).

The compilation of this report was undertaken under the supervision of Mr. Abdul Ramadhan Abeid; Acting Head of Economic Statistics Section. The National Accounts Statistics Section member of staff involved in this assignment are Messrs Khalid Chum; Manager of National Accounts Unit, Fadhil A. Hassan, Bakari K. Makame, Faida Saleh, Hamisa S. Faki, Fahima M. Issa and Suleiman A. Hamad; particularly their dedication and efforts they put into this piece of work is highly appreciated.

The success on production of this report was mainly due to the timely supply of the required input indicators solely provided by the member of staff from all statistics unit in the OCGS. The office would wish to thank for their vital contributions and for the role they played which enable to release this quarterly report in timely manner.

The data sources from both private and public sectors also deserves special thanks for valuable efforts on supplied inputs; acknowledgements also go to the many individuals who helped in collection and processing of the data. It is only through their diligence that we have been able to produce this valuable report.

# Third Quarter National Accounts Analysis in Brief

## 1.0 Introduction

National Accounts data provide the most comprehensive overview of the country's economic performance and the status of the existing of developments in the national economy. In recent years quarterly national accounts have seen a substantial evolution and emerge a useful input for monitoring and evaluating the country economic performance inform monetary policy decisions in short term basis.

The compilation of Zanzibar Quarterly National Accounts focuses on the quarterly constant GDP estimates, also it compiled in line with the annual estimates in terms of its methodology as well as the input indicators used for mostly all industrial activities for which reliable and quick related data are available. Since key statistical data on the relevant quarter will necessarily take some time to collect, revisions will have to be made more frequently, accordingly.

The purpose of this report is to summarize the results of the quarterly estimation of Gross Domestic Product (GDP) for the Third quarter of 2013 which comprise of the month of July to September 2013. The result presented in this report is useful to a wider range of data users including the compilers of annual national accounts estimates. In the mean time, the reports focus on comprehensive estimates for the constant GDP for each economic activity.

### 1.1 The GDP Growth Rate increased to 2.6 Per cent in Third Quarter 2013

Zanzibar Gross Domestic Product (GDP) increased by 2.6 percent in the Third quarter (Q3) of 2013 which is lower compared with an increase of 5.2 per cent observed in the same quarter 2012 (figure 1).

The results revealed that the increase of the rate of 2.6 percent was mainly associated with the significant raise in Mining and Quarrying, Financial Intermediation and Public Administration (Table 3.0)

Other economic activities which show a remarkable growth are Electricity, Construction, Wholesale and Retail Trade and Transport and Communication.

Figure 1: GDP Growth Rates for Third Quarter 2009 to 2013

## 2.0 Comparative Analysis between the Third Quarter of 2012 and Third Quarter of 2013

The GDP growth rates of the economic activities in quarterly basis are presented in table 3.0, while the GDP at constant prices are presented in table 2.0.

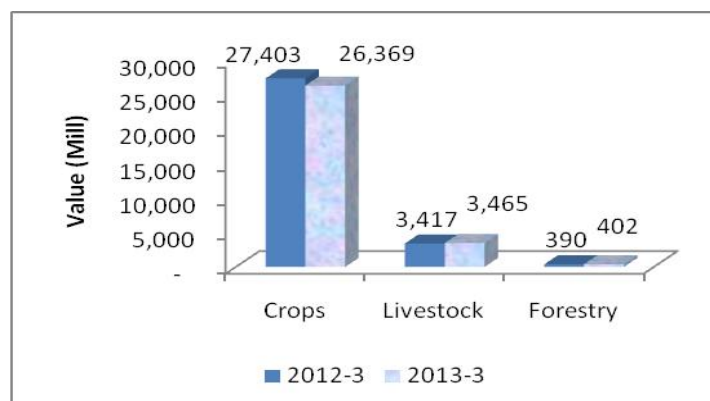

### 2.1 Agriculture

The analysis of the GDP at constant prices for agriculture sectors for the Third quarter of 2012 and 2013 presented in figure 2 cover three main sub sectors namely crops activities, livestock sectors and forestry and hunting economic activities.

Table 3.0 indicates that the percentage change of agriculture declined by 3.1 per cent in the Third

quarter of 2013 compared with decline of 3.0 percent recorded in corresponding quarter of 2012.

Figure 2: Value Added for Agriculture Sector Third Quarter 2013

### 2.2 Fishing

The GDP for fishing activities slightly increased by 0.8 in the Third quarter of 2013 compared with an increase of 15.9 per cent registered in Third quarter of 2012.

The increase of GDP growth for fishing was mainly due to the slight increase of a volume of fish catches from 8,148 tons recorded in Third quarter of 2012 to 8,211 tons in same quarter of 2013 (Figure 3).

Figure 3: Quantity (tons) of Fish Catch Third Quarter 2012 - 2013

## 2.3 Industry

The industry activities include Mining and Quarrying products, Manufacturing activities, Electricity, gas, water supply and Construction. Figure 4 presents the results of percentage changes of manufacturing activities, electricity and construction activities.

The gross value added of manufacturing activities is estimated by applying quarterly volume of production of manufacturing goods. Manufacturing sector declined by 2.6 per cent in the Third quarter of 2013 compared with a growth of 1.1 percent reported in the same quarter of 2012.

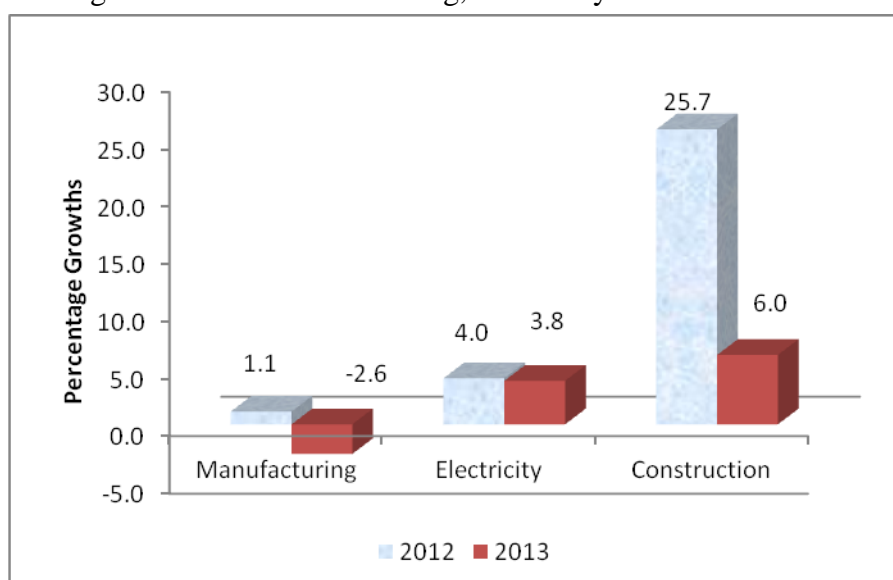

The rate of decline of manufacturing activities in Third quarter 2013 was mainly due to the decline on production of the volume for soft drinks water from 839 litres recorded in Third quarter of 2012 to 428 litres reported in Third quarter of 2013 which is a decrease of 49.0 per cent.

The Mining and Quarrying activities grew by 10.1 percent in the Third quarter of 2013 which is lower as compared with the growth of 27.3 percent recorded in the same quarter of 2012.

The quarterly Value Added at constant prices for Electricity, gas and water compiled by using the monthly quantity of electricity distribution and annual figure of water are distributed across the quarters. Electricity and related sectors grew by 3.8 percent in the Third quarter of 2013 which is slightly lower as compared with the growth of 4.0 percent that was recorded in the same quarter of 2012.

The GDP of construction activities increased by 6.0 percent in the Third quarter 2013 which is lower compared to growth of 25.7 percent recorded in the same quarter in 2012.

Figure 4: Percentage Growth of Manufacturing, Electricity and Construction Industries

## 2.4 Services

The Service Industry includes wholesale and retail trade and repair, hotel and restaurant, transport and communication, financial intermediation, real estate, public administration, education, health and other social and community services.

### 2.4.1 Wholesale and Retail Trade

The economic activities are estimated using imports from the rest of the world as well as items imported from Tanzania Mainland. The estimates of marketed on domestic production are also included.

Wholesale and Retail Trade increased by 6.1 per cent in the Third quarter of 2013 which is slightly lower compared to 7.1 percent growth in the corresponding quarter of 2012.

### 2.4.2 Hotel and Restaurants

The quarterly GDP growth of hotels and restaurants for both 2012 and 2013 are presented in Figure 6. The results indicate that in the Third quarter of 2013 the sector declined by 0.8 percent as compared to decline of 7.7 reported in similar quarter of 2012. This decrease may be associated with the decline on number of tourists' arrivals from 47,571 in 2012 to 47,142 in 2013.

### 2.4.3 Transport and Communication

The transport activity comprises of land, air and sea transports while the communication includes telecommunication services.

Transport and Communication activities for Third quarter 2013 increased by 2.0 percent which is lower compared to 19.5 percent growth of the same quarter 2012.

This slight increase of growth rate may be due to decrease on sales of air times in mobile companies between referenced quarters.

Figure 5: Percentage Growth of Whole Sales and Retail Trade Third Quarter 2009 – 2013

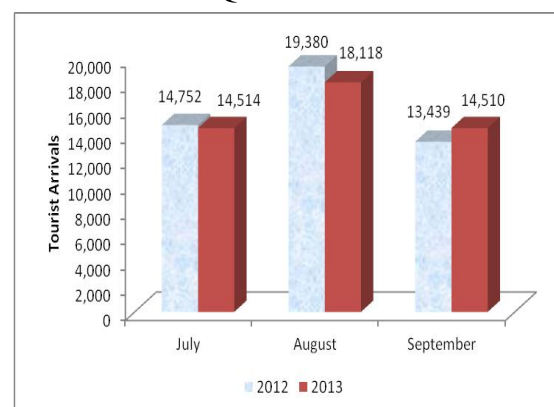

Figure 6: Number of Tourists Arrival in Zanzibar Third Quarter 2012 – 2013

#### 2.4.4 Financial Intermediation

This economic industry includes banking activities, insurance and bureau de change. The compilation of quarterly value added is generated using deposit and loan as indicators.

Financial intermediation registered a growth of 11.5 percent in the Third quarter of 2013 compared to 6.7 percent recorded in the corresponding quarter of 2012.

Figure 7: Trends of Deposits and Loans for Third Quarter 2009 – 2013

#### 2.4.5 Public Administration

The quarterly estimate of Value Added for public administration has been calculated based on the salary and wage trends in the public sector. The GDP growth rate of Public administration sector for the Third quarter 2013 has increased by 13.1 percent compared to decrease of 5.5 percent observed in the same quarter of 2012.

Figure 8: Percentage Growth of Public Administration Third Quarter 2009 – 2013

#### 2.4.6 Education

The GDP growth rate of education declined by 0.1 percent in Third quarter 2013 compared to a growth of 1.0 percent recorded in the similar quarter of 2012.

This decline may be due to decrease of number of student's enrolment observed at primary and secondary schools and tertiary for both Government and Private.

#### 2.4.7 Health and Other Social Services

The GDP growth rate of these activities increased by 1.0 percent in the Third quarter of 2013 compared to growth of 3.8 percent observed in the same quarter of 2012.
