

REVOLUTIONARY GOVERNMENT OF ZANZIBAR

OFFICE OF THE CHIEF GOVERNMENT STATISTICIAN

# ANNUAL SURVEY OF INDUSTRIAL PRODUCTION 2016

**June, 2016**

## **PREFACE**

Office of the Chief Government Statistician (OCGS) is mandated to collect routine statistical information, conduct surveys and censuses to provide relevant, reliable and timely official statistics needed to support evidence – based policy formulation and to monitor development outcomes.

Annual Survey of Industrial Production (ASIP) for Zanzibar is conducted since the establishment of the Zanzibar Statistics Office. This statistical publication provides the information derived from 2016 ASIP. The statistics collected are based on the standards, definitions and classification in accordance with the international principles and guidelines, the International Standards of Industrial Classification of all economic activities (ISIC). Data are presented by regions, size of establishment and ownership. ASIP not only facilitates suitable data collection based on appropriate sampling techniques but also ensures timely dissemination of statistical information to assess and evaluates the dynamics in composition, growth and structure of industrial sector. This survey covered the establishments operated in 2016 and engaged in Manufacturing, Mining and Quarrying sectors.

The main objective of the survey is to collect and establish data that would serve for future monitoring and evaluation of implementation of adopted industrial policies, programs and strategies. The survey aimed at providing information on the economic characteristics of industrial sector. Policy makers and the private sector may use this information for planning, policy formulation/review as well as monitoring and evaluation of government programs intended at improving the sector.

This 2016 annual publication is the product of OCGS which was produced in collaboration with Ministry of Trade, Industries and Marketing and other line ministries. I extend my sincere gratitude to all whom in one way or another participated in the preparation of this publication. Special thanks should go to the staff of the Industrial Statistical Unit for their dedication during the entire period of the survey.

OCGS appreciate the continued cooperation of the owners of the establishments for availing the requested data in time to produce this publication. Special thanks go to the Revolutionary Government of Zanzibar for the materials and financial support for undertaking this survey.

I sincerely hope the information provided in this publication will be of great use to the Government and all the stakeholders in the country.

**Mayasa M. Mwinyi,**  
Chief Government Statistician,  
Zanzibar.

## **ACKNOWLEDGEMENT**

Annual Survey of Industrial Production was prepared by the OCGS with substantive contributions from various institutions and individuals. The office expresses its appreciation to all those who contributed in various ways in making this publication a success.

Foremost, the Office wishes to express its gratitude to owners of the establishments for participating in this enormous exercise by providing the requested information and for the invaluable time they spent.

Our sincere appreciation also goes to our key stakeholders who participated in the consultative meetings convened to guide the design of the survey instruments. Further, we wish to express our gratitude to field personnel involved in data collection, survey execution team and field research team who supervised and coordinated the whole exercise.

The commandment goes to Head of the Office of Chief Government Statistician Pemba, Mr. Haroub A. Masoud, Director for Department of Economic Statistics, Mr. Abdul R. Abeid and the manager of production statistics, Ms. Nour A. Masoud for their guidance and encouragement throughout the entire process.

The office pays special recognition of the Survey technical team who spearheaded the compilation of this basic report. The team comprised of Survey Coordinator Mr. Maulid Saleh Kombo, Survey Desk Officer Ms. Aisha Ali Haji, IT personnel Mr. Abdullah Othman Makame and the survey editor Ms. Halima Mkanga Suleiman who worked tirelessly to produce this report.

Finally, we hope that these results will provide the much sought out information to the ministry responsible for industrial development, industrial community, other stakeholders as well as researchers and policy makers.

## ACRONYMS AND ABBREVIATIONS

ASIP	Annual Survey of Industrial Production
BP	Basic Price
CPC	Central Product Classification
GDP	Gross Domestic Product
GFCF	Gross Fixed Capital Formation
GO	Gross Output
GOS	Gross Operating Surplus
ISIC	International Standard of Industrial Classification
IT	Information Technology
n.e.c	not elsewhere classified
OCGS	Office of the Chief Government Statistician
SMEs	Small and Medium Enterprises
SNA	System of National Accounts
SSF	Social Security Fund
TZS	Tanzania Shillings
VA	Value Added
( )	In the table means negative number
‘000’	Thousands

## CONCEPTS AND DEFINITIONS USED IN QUESTIONNAIRE

Concepts and definitions used in this report are in accordance with the recommendations of the 1993 System of National Account (SNA) as adopted by the United Nations Statistical Commission on its 27th session as the international standard for compilation of national accounts statistics and for the international reporting of comparable national accounting data.

i) **The Statistical Unit:** Ideally the statistical unit as recommended by the United Nations Statistical Office for industrial enquiries is the establishment which is defined as a unit of production engaged in a single kind of activity under a single ownership at a single location. In practice difficulties arose in applying this definition to some enterprises hence the concept of reporting unit was adopted. The reporting unit was the smallest unit of production which could provide the information required by the Survey. With the exception of the following cases, the reporting unit and the establishments are used interchangeable:

- A unit, though under single ownership and carrying out a single activity, may operate at different locations but maintain consolidated accounts which do not readily yield data on separate locations. This occurs in some larger industrial concerns and also in the production of electricity.
- A number of manufacturing units engaged in two or more manufacturing activities. Where possible a completed questionnaire was obtained in respect of each activity otherwise a combined return for all activities was accepted.

ii) **Classification of Products:** Codes for Principal Products Rev.2 of the Central Product Classification (CPC) were post coded (entered directly into questionnaires after all questionnaires were received at the office). A team of staff was recruited and assigned the activity of the post coding. A five-digit level of CPC Rev2 was applied as a product code.

iii) **Gross Output:** Gross output of industries covers the value in the market of goods

and services produced including work in progress and products for own

use. Value of goods sold is adjusted by the change in stocks of finished goods and work in progress.

- iv) **Intermediate Consumption:** Intermediate consumption of industries covers nondurable goods and services used up in production, including repairs and maintenance of the capital stock, research and direct outlays on financing of capital formation such as transfer costs involved in purchases of land and intangible assets. The consumption of materials and supplies is the total cost of purchases adjusted for change in stocks of raw materials.
- v) **Value of stocks:** This item comprises the value of all materials and supplies, fuels, finished and semi-finished products and goods for resale, held by, or under the control of, the establishment (at the establishment itself or in ancillary or other warehouses).
- vi) **Value Added:** The value added is equal to gross output less the value of the intermediate consumption. The sum of the value added of all domestic producers gives the Gross Domestic Product (GDP). Value added may be at factor cost, basic prices or at producers' prices depending on the treatment of taxes on production and subsidies. Value added at basic prices is obtained as the difference between gross output and intermediate consumption whereby output is valued at basic prices and intermediate consumption at purchasers' prices.
- vii) **Basic price:** The basic price is the amount receivable by the producer exclusive of taxes on products and inclusive of subsidies on products.
- viii) **Purchasers' price:** The purchasers' price is the amount payable by the purchaser exclusive of deductible taxes on products (e.g. deductible value added tax).
- ix) **Compensation of Employees:** Compensation of employees comprises all payments by producers of wages and salaries to their employees, in kind as well as in cash and of contributions to social security and to private pension, casualty insurance and similar schemes.
- x) **Gross Operating Surplus:** Gross operating surplus is defined as the excess of value

added over the cost of employees' compensation.

- xi) **Establishment:** An establishment is defined as an economic unit that engages, under a single legal entity, in one, or predominantly one, kind of activity at a single physical location for example, a mine, factory or workshop.
- xii) **Partnership:** An establishment whereby two or more individuals put their capital together set up a business and shares the profits
- xiii) **Public:** An establishment owned by the Government
- xiv) **Parastatal:** Establishments are those belonging to companies, in which the Government has a controlling interest.
- xv) **Cooperatives:** are profits making establishments whose profits are shared amongst its members.
- xvi) **Private company:** is a private business entity where the shares are held privately and with unlimited liabilities.
- xvii) **Private limited company:** is a private business entity where the shares are held privately and with limited liabilities
- xviii) **Number of persons engaged:** This is the total number of persons who work in or for the establishment. It includes working proprietors and partners, unpaid workers, managerial and professional staff, operatives and other employees.
- xix) **Working proprietors and partners** are all individual proprietors and partners who are actively engaged in the work of the establishment without pay.
- xx) **Unpaid workers:** include members of the household of any of the proprietors as well as other workers who work in the establishment without regular pay for at least one third of the normal working time of the establishment.
- xxi) **Employees (operatives and other employees):** Persons who during the reference period performed some work for an agreed amount of pay in cash or in kind are persons who work in or for the establishment and receive pay, in cash or in kind. It includes operatives, and all persons employed on permanent, temporary or on casual terms.

- xxii) **Operatives:** are persons who are directly engaged in the production or related activities of the establishment and who receive pay, in cash or in kind, at regular intervals. Examples are persons engaged in fabricating, processing or assembling, fitters, packers, repairmen, record keeping personnel and inspectors. Please differentiate between skilled and non skilled operatives.
- xxiii) **Payment in kind:** Payment in kind is the net cost to the employer in providing to the employee food, drink, car facilities, fuel allowance, and other goods and services free of charge or at reduced prices.
- xxiv) **Net value added tax paid:** The net value added tax is calculated as the difference between the value added tax invoiced to clients and the deductible value added tax on purchases of raw materials, intermediate products and the like.
- xxv) **Work in progress:** This item refers to the value of all materials which have been partially processed but which are not usually sold without further processing.
- xxvi) **Labour costs:** Wages salaries benefits in kind and employer's contribution to social security schemes.
- xxvii) **Inputs or purchases:** Value of raw, packing and chemical materials consumed cost of re-sales, services received and other cost.
- xxviii) **Output:** Quantity of value of principal products manufactured, sales and services rendered to other forms value of capital goods constructed by the establishment for own use and the value of subsidies received.
- xxix) **Wages:** All cash payments made by the employer to the operatives in connection with the work done. It includes bonuses, overtime, cost of living allowances, commissions and payments made during vacation, sick leave, maternity or casual leave.
- xxx) **Salaries:** All cash payments paid to other employees, commissions and other allowances in connection with the work done. It also includes bonuses and overtime payments.
- xxxi) **Gross value added:** Gross value added is equal to gross output less the value of the

intermediate consumption/production cost. The sum of the value added of all domestic producers gives the contribution to the Gross Domestic Product (GDP). Gross value added may be at factor cost, basic prices or at producers' prices depending on the treatment of taxes on production and subsidies. Value added at basic prices is obtained as the difference between gross output and intermediate consumption whereby output is valued at basic and intermediate consumption at purchasers' prices.

xxxii) **Depreciation:** Represent the estimated allowance for wear and tear of fixed assets during the respective accounting year. Throughout this report, the unit of value is the Tanzania shilling.

xxxiii) **Expenditure on fixed assets:** This is the sum of the cost of new or old capital equipment acquired and value of assets produced on own account construction. Improvements and major alterations to existing fixed assets are also included.

xxxiv) **Gross additions to fixed assets:** This is the expenditure on fixed assets (additions) less total disposals of fixed assets.

xxxv) **Public:** All establishments owned by government and all companies in which government has 50 percent or more shares capital.

xxxvi) **Private:** All establishments owned by private, all companies in which government has less than 50 percent shares capital, companies under Regional or District Cooperative Union, companies under Cooperative Societies and companies not stated above.

xxxvii) **Inventory of Working Capital:** Value of stock of materials and stores, finished products and work in progress at the beginning and at the end of the accounting year.

xxxviii) **Small industries:** the following descriptions were used:

- 1 – 2 Establishments with 1 to 2 persons engaged
- 3 – 4 Establishments with 3 to 4 persons engaged
- 5 – 6 Establishments with 5 to 6 persons engaged
- 7 – 9 Establishments with 7 to 9 persons engaged

xxxix) **Large industries:** the following descriptions were used:

10 – 19 Establishments with 10 to 19 persons engaged

20 – 49 Establishments with 20 to 49 persons engaged

50 – 99 Establishments with 50 to 99 persons engaged

100 – 499 Establishments with 100 to 499 persons engaged

## **EXECUTIVE SUMMARY**

The summary in this section is only for the analysis of all establishments covered in 2016 Annual Survey of Industrial Production (2016 ASIP).

A total of 893 establishments were interviewed of which 195 had 10 or more persons engaged and 698 had less than 10 persons engaged. The highest concentration of these establishments was in Mjini Magharibi with 362 establishments equivalent to 40.5 percent followed by Kusini Pemba with 227 (25.4 percent), Kaskazini Unguja with 119 (13.2 percent), Kaskazini Pemba with 114 (12.8 percent) while Kusini Unguja had 72 (8.1 percent).

A total of 883 establishments (98.9 percent) with 7,090 workers (96.8 percent) were wholly owned by nationals, while 6 establishments (0.7 percent) with 170 workers (2.3 percent) were wholly foreign owned and four (4) establishments (0.4 percent) with 64 workers (0.9 percent) were under joint venture ownership.

Out of 893 establishments, 195 (22 percent) 10 or more persons engaged. Majority of the establishments 861 (96 percent) were in manufacturing Sector while 32 (4 percent) were in mining and quarrying Sector.

Total number of persons engaged was 7,324 of whom 6,851 (94 percent) were in manufacturing and 473 (6 percent) were in mining and quarrying Sector. Mjini Magharibi region engaged the largest number of workers (2,905 persons) equivalent to 40 percent.

Total number of persons employed was 5,114 of whom 4,056 (79.3 percent) were male and 1,058 (20.7 percent) were female. Manufacturing sector employed 4,754 (93 percent) while mining sector employed 360 (7 percent) workers.

The amount paid by industrial establishments as compensation of employees was TZS 20,038 million while the total gross output or total value of goods and services produced was TZS 133,025 million—and total cost of production (Intermediate Consumption) was TZS 71,653 million.

The total value added was TZS 61,372 million of which manufacturing had the largest contribution of TZS 60,459 million (98.5 percent).

Average capacity utilization rate was 60 percent. The value added as a percentage of gross output was 46 percent.

The response rate was 97 percent whereby 893 questionnaires were returned out of 924 questionnaires distributed.

## **CHAPTER ONE**

### **Introduction**

#### **1.1 Background**

This report shows the performance of industrial sector based on 2016 Annual Survey of Industrial Production (ASIP) that was undertaken by the Office of the Chief Government Statistician (OCGS). The 2016 Survey of Industrial Production covered industries that operated in the calendar year 2016. The statistical methods and procedures used in the Survey followed the international recommendations and shall be applied in the future to similar statistical operations. The Survey was undertaken for small, medium and large establishments with size 1-4, 5-9 and 10+ persons engaged. This report gives descriptions of the methods and concepts applied in undertaking the survey as well as the results obtained thereof. The statistics reflect the contribution of the industrial sector of the economy. The frame of the Survey was taken from 2016 Central Register of Establishment (CRE).

The 2016 Survey of Industrial Production (ASIP) for Zanzibar has been conducted since the establishment of the Zanzibar Statistical Office. The last annual industrial survey was conducted in 2010. The 2016 Survey of industrial production was funded by the Revolutionary Government of Zanzibar (RGOZ).

#### **1.2 Legal Authority**

The Annual Survey of Industrial Production was conducted under the Authority of the Statistical Act No. 9 of 2007. Under this act, Office of the Chief Government Statistician is empowered to collect statistics from various fields including industrial statistics.

#### **1.3 General Objective**

The general objective of the survey is to provide information on the economic characteristics of Zanzibar industrial sector to management, policy makers, researchers, academia and the private sector among other users in planning, policy formulation or review and monitoring and evaluation of implementation of the adopted government industrial policies, programmes and strategies aimed at improving the sector.

#### **1.4. Specific Objectives**

- i. To assess the status of the industrial sector performance in the country in 2016.
- ii. To identify conditions that affect firm level productivity and competitiveness.
- iii. To secure inputs for use by the government and other organs in developing or review policies programmes and strategies that support sector productivity growth.
- iv. To provide private sector with facts to support dialogue with the government and other development partners, so as to enhance public - private partnership, and
- v. To update the existing data base at the level of industrial establishments
- vi. To serve as a bench mark information for future survey.

## **CHAPTER TWO**

### **Methodology**

#### **2.1 Introduction**

This chapter describes and discusses the schedules of activities undertaken in conducting the 2016 Survey of Industrial Production. Broadly it covers organization of the survey methods and techniques, data collection, processing and organization of the report.

#### **2.2 Reference Period**

The twelve months from January to December of 2016 calendar year was used as a reference period. Establishments that could not supply data according to calendar year were advised to supply the data according to the financial years that covered longer part of the reference calendar year.

#### **2.3 Establishment Classifications**

Establishments were classified into industries on the basis of major activity in conformity with the International Standard Industrial Classification (ISIC) Revision 4. Each industry is basically defined in terms of its principal product or service, these being similar in nature or commodity associated in the production.

Moreover in order to ensure confidentiality of information at individual establishment level, data have been classified in main industrial groups 14, 19 and 23 of ISIC Rev.4.

#### **2.4 Unit of Inquiry**

The unit of inquiry is an establishment which is defined as an economic unit which engages under a single ownership or control in one or predominantly one kind of economic activity at a single physical location i.e. an individual firm, mine, factory or workshop. However for certain firms which could not furnish separate data on an establishment basis, the enterprise was used as the unit of enquiry. It should be noted that due to record keeping practices of some firms, it had not been possible in every case to strictly follow the definition of an establishment as stated above. Therefore in a few cases, the restrictions especially on location were taken into account.

## **2.5 Scope and Coverage of the Survey**

The Survey covered all industrial establishments with five or more workers operated in 2016 and a sample of 10 percent of size 1-4 establishments. The survey covered about 893 establishments.

According to the UN International Recommendations the industrial sector is comprised of establishments engaged in “mining and quarrying” (ISIC Rev 4, Section B), “manufacturing” (Section C), “electric power generation transmission and distribution” (Section D) and “water collection, treatment and supply” (Section E). However, the 2016 ASIP covered Sections B and C only; this was due to the fact that sections D and E have monopoly nature of ownership. These two major activities are government owned with single entity of operation.

According to international recommendation manufacturing is defined as the physical or chemical transformation of materials, substances or components into new products whether the work is performed by power driven machines or by hand whether it is done in a factory or in the workers home and whether the products are sold at whole sale or retail prices. Mining and Quarrying include the extraction of minerals occur naturally as solids, liquids or gases. Extraction can be achieved by different methods such as underground or surface mining, well operations, seabed mining etc. As far as Zanzibar is concerned, this sector comprises of stone quarrying and extraction of salt only.

## **2.6 The Questionnaire**

The questionnaire was designed according to the International Recommendations for Industrial Statistics of the United Nations and took into consideration the requirements of the stakeholders. The information collected satisfies the needs of National Account and are considered to be useful to the government, researchers and the business community. The following was the information collected through the questionnaire.

- 2.6.1. General information:** Name, address, telephone, principal activity and type of ownership etc.
- 2.6.2. Employment:** Refers to average number of employees (operatives and other employees) working proprietors and unpaid family workers.
- 2.6.3. Labour costs:** Wages, salaries, benefits in kind and employers contribution to social security schemes.
- 2.6.4. Inputs/Purchases:** Value of raw packing and chemical materials consumed, cost of re-sales, services received and other cost.
- 2.6.5. Output:** Quantity and value of principal products manufactured, sales and services rendered to, other forms of value of capital goods constructed by the establishment for own use and the value of subsidies received.
- 2.6.6. Inventory of working capital:** Value of stock of materials and stores, finished products and work in progress at the beginning and at the end of the accounting period.
- 2.6.7. Expenditure on fixed assets and depreciation:** Capital expenditure on land, building and structures, machinery/equipment, vehicles and other fixed assets during the accounting year.
- 2.6.8. Depreciation:** represents the estimated allowance for wear and tear of fixed assets during the respective accounting period

## **2.7 Response Rate**

The response rate was calculated based on all questionnaires completed and returned, but excluded the establishments that could not be located or closed. A total of 924 questionnaires which were distributed a total of 893 questionnaires (97 percent) were collected.

## **2.8 Data Collection**

Data collection exercise was undertaken by a well trained team of 18 enumerators and three (3) supervisors.

Field work started in September 2017 for Unguja and November 2017 for Pemba. It was completed by the end of February 2018. The field staffs were recruited from OCGS and the line ministries. They visited the establishments and worked closely with the respondents and assisted them filling in the questionnaires. Respondents were asked to provide the data from their accounting records in 2016.

## **2.9 Data Processing**

Enumerators and some respondents returned completed questionnaire to OCGS, Zanzibar. Questionnaires were then edited and post coded accordingly.

The CSPro.16 Software was used for data entry system, after which the data were transferred to Microsoft Excel for cleaning and SPSS for generating tables. The cleaned dataset was then used to generate the preliminary tables as per tabulation plan.

## **2.10 Organization of the Report**

The report presents the industrial statistics according to the UN recommendations (2008). The tables are grouped separately at end of the report and refer to establishments with size, 1-4, 5-9 and 10 or more workers. The report present the main findings relating to quantitative information collected through the survey.

## **2.11 Limitations of the Presented Statistics**

The Survey contents and results have taken into account the needs of different users. However the users are here by cautioned that the survey had the following limitations.

- i. The Survey was conducted according to the International Recommendation for industrial statistics. The tendency among establishments is to hide information relating mainly to outputs and to over- report on inputs due to the belief that information supplied would be used by Revenue Authorities for tax purposes. The regular conduct of such Survey would help in dissipating this fear and at the same time, improve the quality and reliability of the supplied information.
- ii. Record keeping was also a challenge to many establishments especially those with less than ten (10) persons engaged.
- iii. Many establishments could not provide detailed information for certain items such as:

- a) Purchase of raw materials and sales from own production by main product.
- b) Separately consumption estimates for electricity water and fuels
- c) Value of stock and value of fixed assets by type
- d) Missing data on level of stocks and assets. These had to be estimated.
- e) A number of establishments are in formally operating and therefore do not have books of accounts.
- f) The report includes table on sales and purchases by product category. These should however be used with caution since some establishments did not report such details.
- g) It was found that a few returned questionnaires still had certain inconsistencies which stem from insufficient understanding of the terms and concepts applied.
- h) Some establishments were found to have closed their businesses, moved to other places, reported erroneously number of employees, or even changed the main activity of the establishment

The above limitations however have no serious effect on the overall quality and reliability of the survey results. Statistics presented in this report reflect the current status and structure of small, medium and large establishment in Zanzibar Industrial Sector. The Government, business community and other users can make use of these results, which constitute the only available information based on International Recommendations for Industrial Statistics.

## **CHAPTER THREE**

### **Major Findings**

#### **3.1 Introduction:**

The analysis of the 2016 Annual Survey of Industrial Production (ASIP) assesses the performance in operation of industrial establishments including Capacity Utilization, Level of material used in production, employments, estimates of the contribution of Manufacturing and Quarrying industries in overall GDP. Some information from individual establishments' level has been grouped together by more than one group. The analysis considered the confidentiality aspect as required by section 20 of the Statistics Act No 9 of the year 2007.

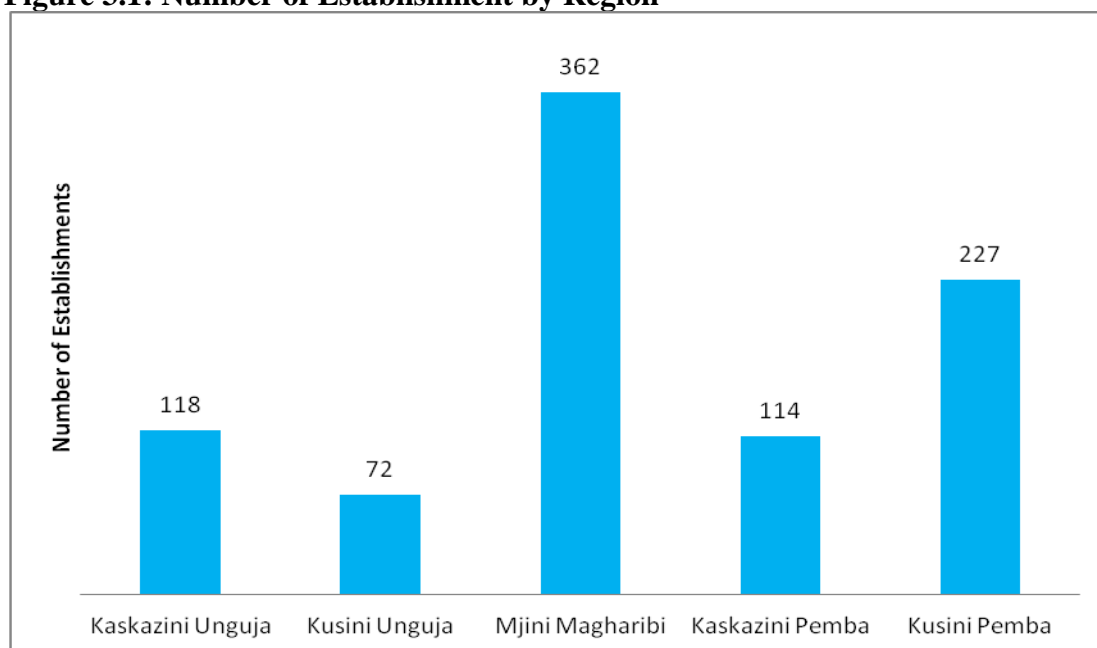

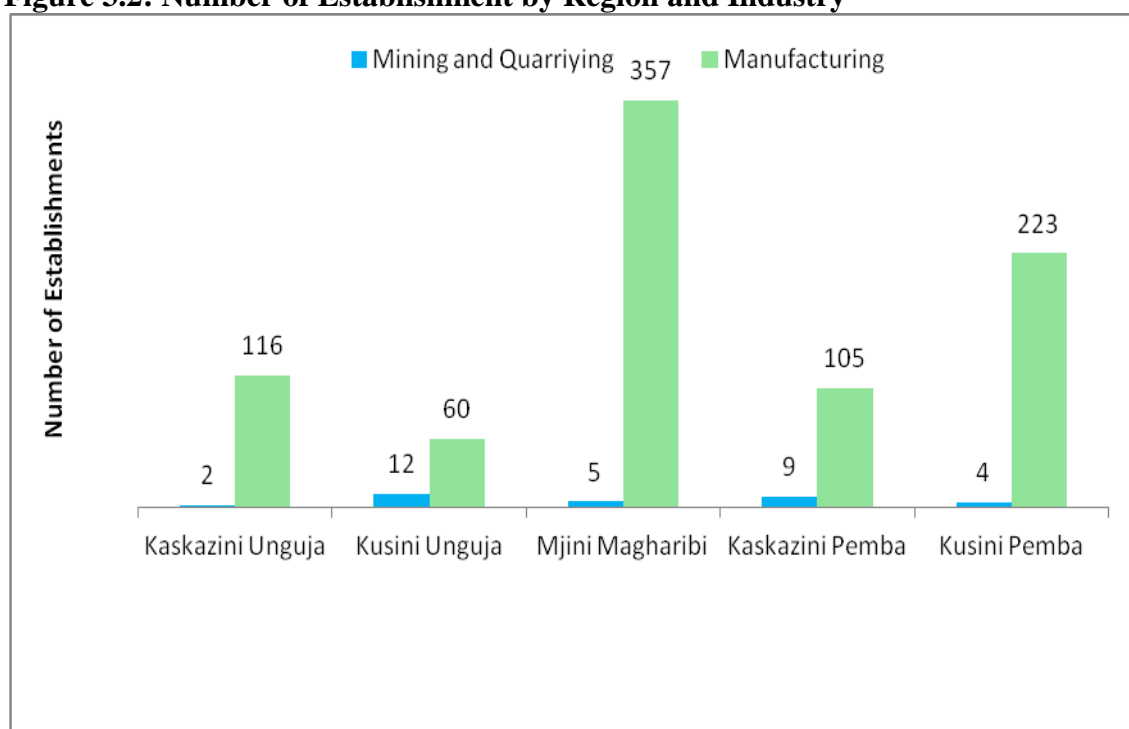

#### **3.2 Findings**

The 2016 Annual Survey of Industrial Production comprised of all establishments engaged 5 and more persons and only 10 percent of the establishment engaged 1 - 4 persons. The analysis was undertaken separately for establishments with 1–9 persons and those with 10 or more persons and tables for all establishments.

#### **3.3 Regional Distribution of the Establishments (All Establishments):**

This survey comprised 893 establishments that were operated in Zanzibar for the year 2016. Among them 32 (3.6 percent) were in Mining and Quarrying and 861 (96.4 percent) were in Manufacturing.

Regional distribution of industrial establishments is uneven among regions. The highest concentration is in Mjini Magharibi with 362 establishments and the lowest is in Kusini Unguja region with 72 establishments. There is high concentration of manufacturing establishments in Mjini Magharibi, while high concentration of mining and quarrying establishment was found in Kusini Unguja region with 37.5 percent. The concentration of establishments is illustrated in figure 3.2 below.

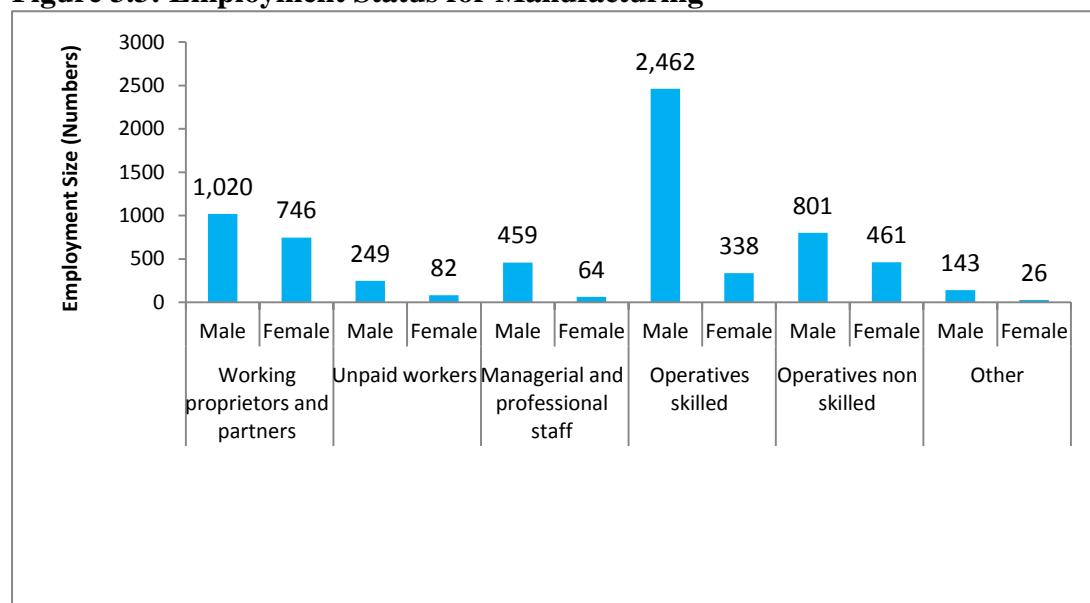

**Figure 3.1: Number of Establishment by Region****Figure 3.2: Number of Establishment by Region and Industry**

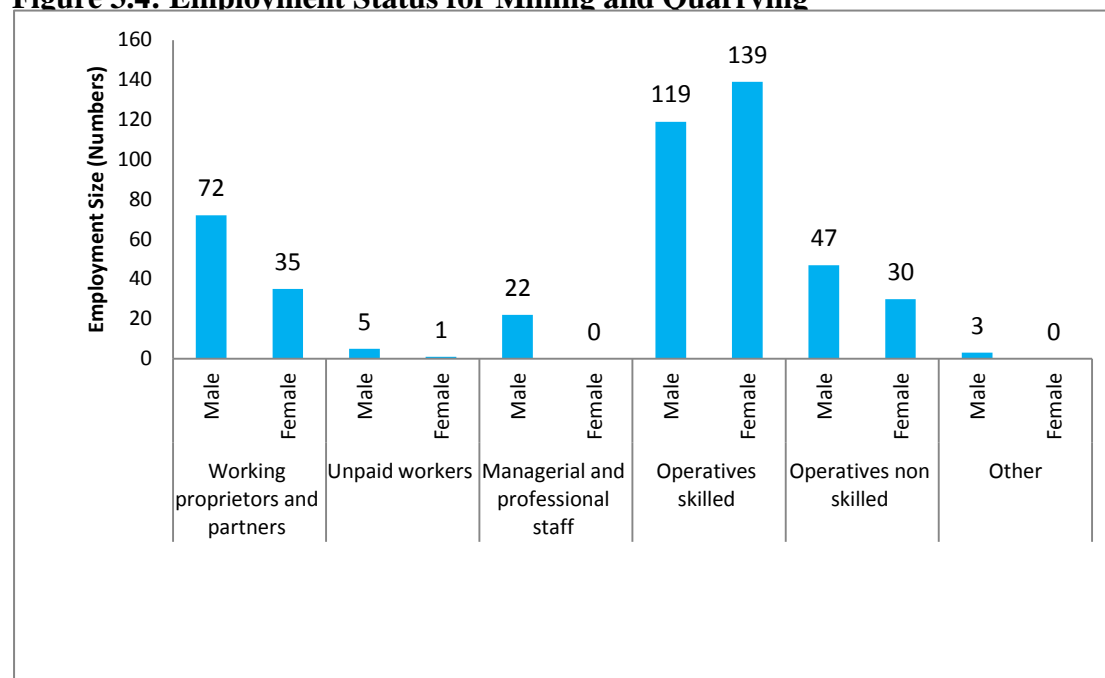

### 3.4 Ownership:

Out of 893 establishments, 695 (77.8 percent) were under individual proprietorship. Corporate, as a form of ownership shares 132 establishments (14.8 percent). Other forms of ownership shares only 7.4 percent of the establishments.

**Figure 3.3: Employment Status for Manufacturing**

**Figure 3.4: Employment Status for Mining and Quarrying**

### **3.5 Persons Engaged:**

The results also revealed that, for all establishments 698 (78.2 percent) have less than 10 persons engaged, while those with 10 or more persons were 195 establishments (21.8 percent)

### **3.6 Compensation of Employees:**

Compensation of employees for all establishments paid amounted to TZS 20,038 million. The amount includes gross wages and salaries, overtime payments in kind, refund for travelling and employees contribution to the Social Security Fund.

### **3.7 Gross Output:**

The gross output of goods and services produced in the industrial sector in 2016 was TZS 133,025 million. The gross output of manufacturing industries is 97.9 percent of total gross output and only 2.1 percent is from mining and quarrying industries.

The Survey results showed that the main consumer of outputs produced in all industries is local markets. This contributed (91.7 percent) of production. The exported portion of the gross output was 8.3 percent only.

The intermediate consumption (total cost of production) covers non-durable goods and services used up in production, including repairs and maintenance of the capital stock, research and direct outlays on financing of capital formation such as transfer costs involved in purchases of land and intangible assets. The value of intermediate consumption for the industrial sector in 2016 was TZS 71,653 million. Raw materials constitute 63,330 (88.4 percent) of the cost of the intermediate consumption consumed. Much of raw materials consumed for production worth TZS 45,754 (72.2 percent) were locally produced while only 27.8 percent (TZS 17,577 million) were imported. Industrial and non-industrial Services consumed worth TZS 3,951 million of which 2,783 million was used for payments of non-industrial services and TZS 1,168 million for industrial services. Consumption of utility (electricity, water and fuel) was TZS 4,179 million (Table 11).

Value added measures the contribution of the industrial sector to GDP. It is obtained by deducting intermediate consumption from the gross output. The 2016 ASIP results indicated that the value added generated from all industrial sector was TZS 61,372 million. A total value of TZS 20,038 million was paid as a compensation of employees and TZS 185 million as taxes on production (less subsidies) to the government. This resulted to gross operating surplus (gross profit) of TZS 41,148 million (67 percent) of the value added.

### **3.8 Large Industries (10+)**

The total number of establishments with 10+ persons engaged that operated in Zanzibar for the year 2016 was 195, of which 21 establishments (10.8 percent) were in mining and quarrying and 174 (89.2 percent) were in manufacturing.

#### **3.8.1 Ownership:**

Most of the establishments were under individual proprietorship, which comprised 103 establishments (52.8 percent) where 14 were for mining and 89 for manufacturing. Corporative with 65 establishments accounted for 33.3 percent while the remaining type of ownership accounted for 13.9 percent.

#### **3.8.2 Persons Engaged:**

The industrial sector in Zanzibar is mainly dominated by small and medium enterprises (SMEs). The results from 2016 ASIP revealed that about 76.9 percent of the establishments have 10 – 19 persons engaged, while only 4 establishments (2.1 percent) engaged 100 or more persons.

The Foreign Direct Investments (FDI) in the industrial sector is very marginal, more efforts are needed to invite FDI in-order to boost industrial sector in Zanzibar. The results of the survey revealed that, 188 establishments (96.4 percent) that engaged 10 or more persons were owned by Nationals. Four establishments (2.1 percent) were owned by foreigners and three establishments were jointly owned (by foreigner and locals).

### **3.8.3 Employment and Compensation of Employees:**

Although SMEs dominated industrial sector in Zanzibar, its contribution on employment is minimal. The findings revealed that, the persons engaged in establishment with 10 or more persons engaged were 4,085 of whom 2,606 (63.8 percent) were males and 1,479 (36.2 percent) were females. Manufacturing sector took large share of employment with 3,662 persons (89.6 percent) of the total while the rest were in mining and quarrying (Table 6 or 7).

Distribution of employment status for manufacturing and mining and quarrying is illustrated in the figure (3.3 and 3.4). In both mining and quarrying and manufacturing most employees were skilled operatives followed by working proprietors in mining and quarrying and non-skilled operatives in manufacturing. Skilled operative employees are the majority (39 percent) of total persons employed in the sector (Table 7).

### **3.8.4 Compensation of Employees:**

Compensation of employees plays an important role in giving harmony at work place, and motivates workers to increase production. The compensation of employees paid by industries amounted to TZS 9,211 million. This amount includes gross wages and salaries, overtime payments in kind, refund for travelling and employees contribution to the Social Security Fund (Table 12).

### **3.8.5 Gross Output:**

The gross output of goods and services produced in 10 or more persons engaged was TZS 81,989 million. This is equivalent to 61.6 percent of total gross output produced in the industrial sector amounted to TZS 133,025 million (Table 10).

The Survey results showed that the local market was the main consumer of outputs produced in industrial sector. This contributed 83.4 percent of total gross output while the exported portion of the gross output was 16.6 percent only.

The value of intermediate consumption for the establishments with 10 or more persons engaged was TZS 49,006 million. Raw materials constituted 42,371 (86.5 percent) of the cost of the intermediate consumption. Much of raw materials consumed for production were locally

produced (59.1 percent) while only 40.9 percent (TZS 17,330 million) were imported. Industrial and non-industrial services consumed worth TZS 3,318 million of which TZS 872 million was used for payments of non-industrial services and TZS 2,446 million for industrial services. Consumption of utility (electricity, water and fuel) was TZS 3,036 million (Table 28).

The value added generated from establishments with 10 or more persons engaged was TZS 32,982 million. A total value of TZS 9,211 million was paid as compensation of employees and TZS 116 million as taxes on production (less subsidies) to the government. This resulted to gross operating surplus (gross profit) of TZS 23,654 million equivalents to 71.7 percent of the value added (Table 10).

### **3.8.6 Operating Ratio:**

The value added to gross output ratio was 40.2 percent. The ratio for mining sector was 32.7 percent and for the manufacturing was 40.5 percent. The highest ratio in manufacturing of sector was manufacture of wood and products of wood and cocks (except furniture) which was 81 percent.

The overall compensation of employees as percentage of value added of establishments with 10 or more persons engaged stood at 27.9 percent. Few establishments have the ratio over 100 percent. This is mainly due to the fact that most of these are government owned establishment which receive subsidies for wages and salaries. Although, some employees work seasonally, they receive full salaries.

The average gross output per establishment was TZS 6,134 million and the average output per persons engaged stood at TZS 186 million. The corresponding figures for manufacturing and mining and quarrying per person were TZS 179 millions and TZS 15 thousands respectively.

## **3.9 Small Establishments (Less than 10)**

Establishments that operated in Zanzibar for the year 2016 and engaged less than 10 persons were 698, of which 11 of them (1.6 percent) were in mining and quarrying and 687 ( 98.4 percent ) were in manufacturing (Table 2)

**3.9.1 Ownership:**

Most of the establishments were under individual proprietorship, which comprised 592 establishments (84.8 percent) where 7 were for mining and quarrying and 585 for manufacturing. Corporative with 67 establishments accounted for 9.6 percent of all small establishments while the remaining type of ownership accounted for 5.6 percent (Table 1).

### **3.9.2 Size of Establishments:**

Establishments of size 5-6 share the highest proportion (33.4 percent) among small establishments in Zanzibar, followed by establishments of size 1-2. Only 21 establishments (3.0 percent) engaged nine (9) persons. The survey dealt not only with establishments that engaged 10 or more persons, but also considered establishments with less than ten persons (Table 11).

### **3.9.3 Regional Distribution of the Establishments**

Regional distribution of small scale industrial establishments is not different from that of large scale. The highest concentration of small scale industries is in Mjini Magharibi (289) and the lowest is (47) in Kusini Unguja region. Other mining and quarrying (not elsewhere classified) comprised extraction of salt which are found in Kaskazini Pemba regions only (Table 13).

### **3.9.4 Nationality of Owners of Establishments**

The survey results revealed that, 695 small scale establishments (99.6 percent) were owned by nationals, two and one establishments were owned by foreigners and joint venture respectively (Table 21).

### **3.9.5 Employment and Compensation of Employees**

The survey revealed that, for small establishments the number of persons engaged were 3,239 of whom 2,801 were males and 438 were females. Manufacturing industry took large share of employment (98 percent) of total employment and the rest was mining and quarrying.

The compensation of employees paid amounted to TZS 10,826 million. The amount includes gross wages and salaries, overtime payments in kind, refund for travelling and employees contribution to the Social Security Fund (Table 3).

### **3.9.5 Gross Output**

The gross output of goods and services produced in the industrial sector in 2016 from establishments with less than 10 persons engaged was TZS 51,036 million. The value of intermediate consumption (total cost of production) was TZS 22,646 million and the value added generated from the sector was TZS 28,389 million. The sector paid TZS 10,826 million as

compensation of employees and TZS 69 million as taxes on production (less subsidies) to the Government. The gross operating surplus (gross profit) was TZS 17,493 million (Table 3).

### **3.9.6 Operating Ratio:**

The results from survey revealed that value added to gross output ratio was 56 percent for small establishments. The ratio for mining sector was 21 percent and for the manufacturing was 56 percent. The highest ratio in the manufacturing sector was manufacturer of basic iron and steel products which amounted to 84 percent (Table 5).

The average gross output per establishment was TZS 73 million and the average output per persons engaged stood at TZS 15.7 million. The corresponding figures of output per persons engaged were TZS 15.9 million and TZS 2 million for manufacturing and mining and quarrying respectively.

## **CHAPTER FIVE**

### **Recommendation and way Forward**

The 2016 Survey of Industrial Production shows that Zanzibar is dominated by micro and small industries hence it fails to compete in the Regional and International markets. There exist unexploited manufacturing sector opportunities especially on food and food stuff processing, carpentry and tailoring. The recommended areas are supported with availability of raw material and skills.

There is need to involve different stakeholders (including The National Chamber of Commerce, Agriculture and Industries) in the preparation and raising awareness of the Survey. This may be facilitated through publicity workshops so as to sensitize the industrial entrepreneurs on the importance of statistical data for planning, policy and decision making, hence ease implementation on the part of OCGS.

The Government has the role to support and protect new Industries with modern production technologies through:

- Improving manufacturing industries production capacity.
- Promoting and support expansion of products manufacturing processes.
- Encouraging utilization of female workers in the industrial sector.
- Improving entrepreneur's skills at regional level in order increase productivity, employment and market.

Support implementation of industrial sector specific policies to enhance optimal use of industrial services at minimum cost.

## ANNUAL SURVEY OF INDUSTRIAL PRODUCTION , 2016

Dear Sir,

Under the Statistics Act, No. 9, 2007 you are required to complete this form and return it to the Office of the Government Statistician together with a copy of your balance sheet. In accordance with the Act, all information supplied in this return shall be treated as CONFIDENTIAL. Completion and return of this questionnaire within 14 days is compulsory. The information will be used for statistical purposes only and will not be communicated to any fiscal or other organizations. The figures should be taken from the accounts of the enterprise for the accounting year covering 2016. If precise figures are not available, please give best estimates you can.

Thanking you in anticipation

.....

Chief Government Statistician

## PART II

## 2. EMPLOYMENT

## 2.1 Number of persons engaged

Employment as at	Resident		Non-resident		Total	
	Male	Female	Male	Female	Male	Female
30 June 2016	*	*	*	*	*	*
31 December 2016	*	*	*	*	*	*

## 2.2 Number of persons engaged as at 31 December 2016 by category

Category	Resident		Non-resident		Total	
	Male	Female	Male	Female	Male	Female
2.21 Working proprietors and partners	*	*	*	*	*	*
2.22 Unpaid workers	*	*	*	*	*	*
2.23 Employees: (a) Managerial and professional staff	*	*	*	*	*	*
2.24 (b) Operatives - skilled	*	*	*	*	*	*
2.25 (c) Operatives - non skilled	*	*	*	*	*	*
2.26 (d) Other	*	*	*	*	*	*
<b>Total</b>	*	*	*	*	*	*

**3. LABOUR COSTS DURING REFERENCE PERIOD**

Description	Amount paid (T Shs.)
3.01 Gross wages and salaries (including bonus and gratuities)	
3.02 Overtime payments	
3.03 Reimbursement of travel expenses	
3.04 Payments in kind, e.g., food, drinks, fuel	
3.05 Employer's contribution to ZSSF	
3.06 Training expenses	
3.07 Other labour costs, please specify	
<b>Total</b>	*

## 4. PURCHASES MADE DURING REFERENCE PERIOD 2016 (please exclude VAT)

## 4.1 Electricity, water and fuels consumed

Description	Unit	Quantity	Value (T. Shs.)
4.11 Electricity	KWH		*
4.12 Water	M <sup>3</sup>		*
4.13 Gas			*
4.14 Fuel for machines and vehicles			*
4.15 Wood, charcoal and peat			*
4.16 Other fuels, please specify			*
<b>Total</b>			*

**4.2 Goods purchased****4.21 Cost of goods sold as purchased (T. Shs.)****4.22 Materials and supplies purchased**

Description	CPC CODE	Unit	Value in T.Shs.	
			Imported	Local
			Quantity	Value
<b>1</b>				
<b>2</b>				
<b>3</b>				
<b>4</b>				
<b>5. Other including stationery and spare parts</b>				
<b>6. Total</b>				*

**4.3 Services consumed****4.31 Industrial services**

Description	Amount (T. Shs.)
4.311 Contract and commission paid for work done on your materials	
4.312 Cost of repairs and maintenance work	
<b>Total</b>	*

**4.32 NonIndustrial services**

Description	Amount (T. Shs.)
4.321 Postage and other communication costs	
4.322 Rental of building, machinery, plant and equipment	
4.323 Storage and hire of transport	
4.324 Publicity and bank charges	
4.325 Consultancy fees (legal, fiscal, accountancy, etc.)	
4.326 Other, please specify	
<b>Total</b>	*

**4.4 Other expenses**

Description	Amount (T.s Shs.)
4.41 Interests and dividends paid excluding bank charges	
4.42 Insurance paid	
4.43 Income tax	
4.44 Net value - added tax paid	
4.45 Other taxes on production, e.g., rates, licences, road tax	
4.46 Other, please specify	
<b>Total</b>	*

**5. OUTPUT (please exclude VAT and excise duties)****5.1 Sales from own production**

Description	CPC CODE	Unit	Value in T. Shs.		
			Exported		Locally sold
			Quantity	Value	Quantity
<b>1</b>					
<b>2</b>					
<b>3</b>					
<b>4</b>					
<b>5. Other</b>					
<b>6. Total</b>				*	

**5.2 Receipts from services rendered****5.21 Industrial services**

Description	Amount (T. Shs.)
5.211 Receipts from contract work done for others on their materials	
5.212 Receipts from repair and installation work done for others	
5.213 Other, please specify	
<b>Total</b>	*

**5.22 NonIndustrial services**

Description	Amount (T. Shs.)
5.221 Rent received	
5.222 Receipts from transport services rendered to others	
5.223 Value of products sold in the same condition as purchased	
5.224 Receipts from warehousing services	
5.225 Other, please specify	
<b>Total</b>	*

**5.23 Other receipts**

Description	Amount (T.Shs.)
5.231 Interests and dividends received	
5.232 Insurance premiums received	
5.233 Subsidies received	
5.234 Other, please specify	
<b>Total</b>	*

**6 VALUE OF STOCKS**

Description	Value in T.Shs.	
	Opening balance	Closing balance
6.1 Materials, supplies and fuels (raw materials, chemicals, etc.)	*	*
6.2 Work in progress (semi-finished products)		
6.3 Finished products	*	*
6.4 Goods purchased for resale		
<b>Total</b>	*	*

**7 VALUE OF FIXED ASSETS**

Type	Value at beginning	Additions	Sales	Depreciation during period	Value in T.Shs.
					Value at end
7.1 Land					
7.2 Buildings and other construction works					
7.3 Transport equipment					
7.4 Machinery and other equipment					
7.5 Other					
<b>Total</b>	*	*	*	*	*

**8. PROBLEMS ENCOUNTERED DURING REFERENCE PERIOD -2016****(multiple answers are allowed)**

Insufficient demand	A	Economic environment	J
Shortage of raw materials	B	High cost of production	K
High taxes	C	Financial problems/foreign currency	L
Insufficient production capacity	D	Inflation/Depreciation of Currency	M
Shortage of qualified labour	E	Illegal imports	N
Lack of equipment	F	Inadequate supply of electricity	O
Transport problems	G	Inadequate supply of water	P
	H	Marketing problems	Q
	I	Other, specify	R
