## PRODUCER PRICE INDEX - MANUFACTURING AND MINING JUNE QUARTER, 2024

June, 2024

### HIGHLIGHTS

The Producer Price for Manufacturing and Mining decreased by 0.1 percent for the quarter ending June 2024 compared to the previous quarter ended March 2024. The movement of Mining and Quarrying in this quarter remained unchanged compared to the previous quarter; it means that the price of the mining and quarrying sector is the same as in the previous quarter. The movement of manufacturing also decreased by 0.1 percent from 162.1 recorded in March 2024 to 161.9 recorded in June 2024.

The year on year rate of change (annual percentage change) for the second quarter of the year 2024 as measured by the all items in Producer Price Index was decreased by 0.5 percent, this means that prices as measured by the all items in PPI increased by that value between the second quarter of 2023 to its corresponding quarter of 2024.

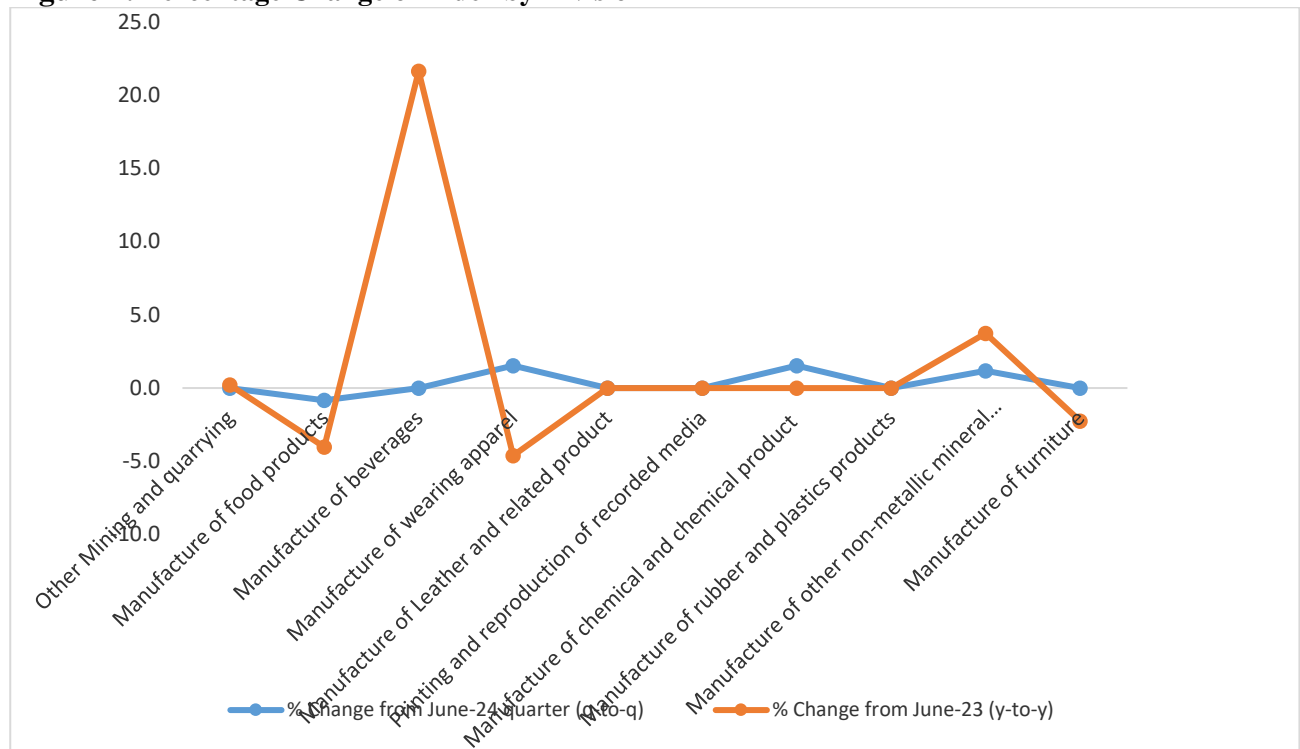

There are no changes in the movement of Mining and Quarrying from the previous quarter while for the corresponding quarter the movement increased by 0.2 percent. In Manufacturing sector, the index decreased by 0.5 percent from previous quarter and for the corresponding quarter of 2024 (See Table1).

**Table 1: Changes in Producer Price Indices for June, 2024**

DESCRIPTION	Weight (2012, CIP)	Q2_2023	Q1_2024	Q2_2024	% Change from June-24 quarter (q-to-q)	% Change from June-23 (y-to-y)
TOTAL PPI	100.0	162.1	161.6	161.3	-0.1	-0.5
MINING AND QUARRYING	3.7	147.7	148.0	148.0	0.0	0.2
Other Mining and quarrying	3.7	147.7	148.0	148.0	0.0	0.2
MANUFACTURING	96.3	162.7	162.1	161.9	-0.1	-0.5
Manufacture of food products	48.3	181.5	175.6	174.2	-0.8	-4.0
Manufacture of beverages	11.0	96.7	117.6	117.6	0.0	21.6
Manufacture of wearing apparel	3.1	114.9	108.0	109.6	1.5	-4.6
Manufacture of Leather and related product	0.8	288.9	288.9	288.9	0.0	0.0
Printing and reproduction of recorded media	3.2	109.4	109.4	109.4	0.0	0.0
Manufacture of chemical and chemical product	5.2	154.8	152.5	154.8	1.5	0.0
Manufacture of rubber and plastics products	0.6	113.9	113.9	113.9	0.0	0.0
Manufacture of other non-metallic mineral products	15.9	159.3	163.3	165.2	1.2	3.7
Manufacture of furniture	8.2	182.7	178.6	178.6	0.0	-2.2

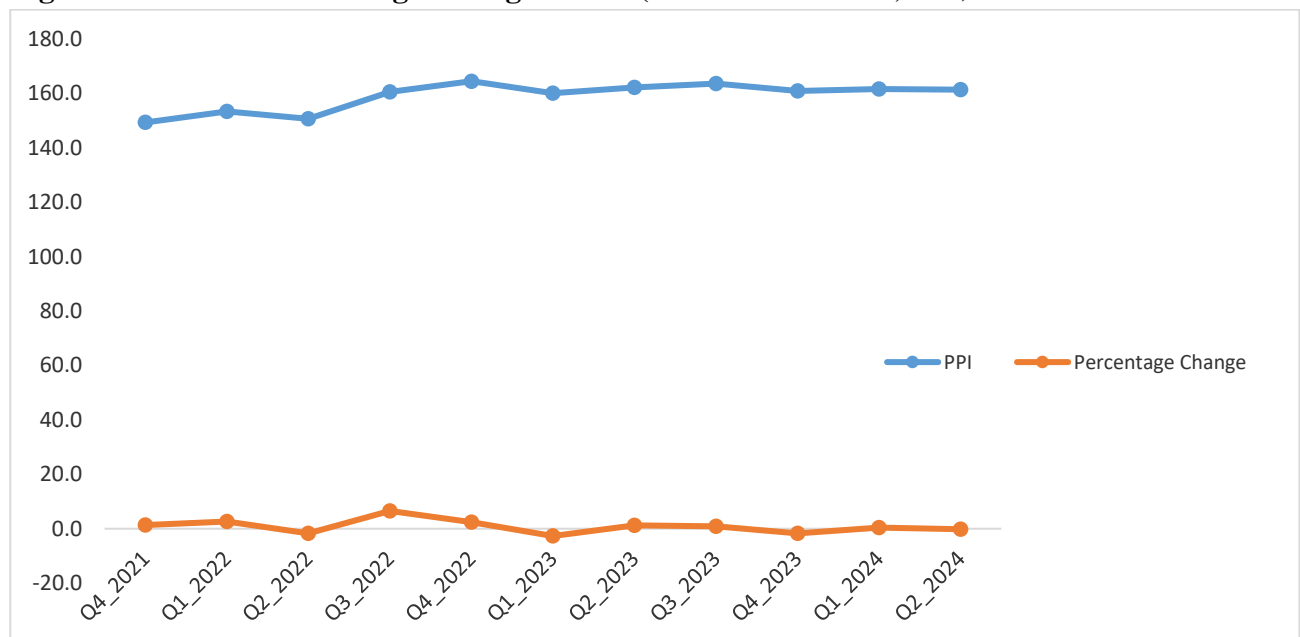

**Figure 1: Percentage Change of Index by Division**

**Source:** Office of the Chief Government Statistician

Manufacture of beverage shows the highest increase in index (21.6 percent) in both previous and corresponding quarter where, there is no change in price of Mining and quarrying sector in the second quarter of the year 2024 compared with previous quarter while with corresponding quarter of the year 2023 it increases by 0.2 percent.

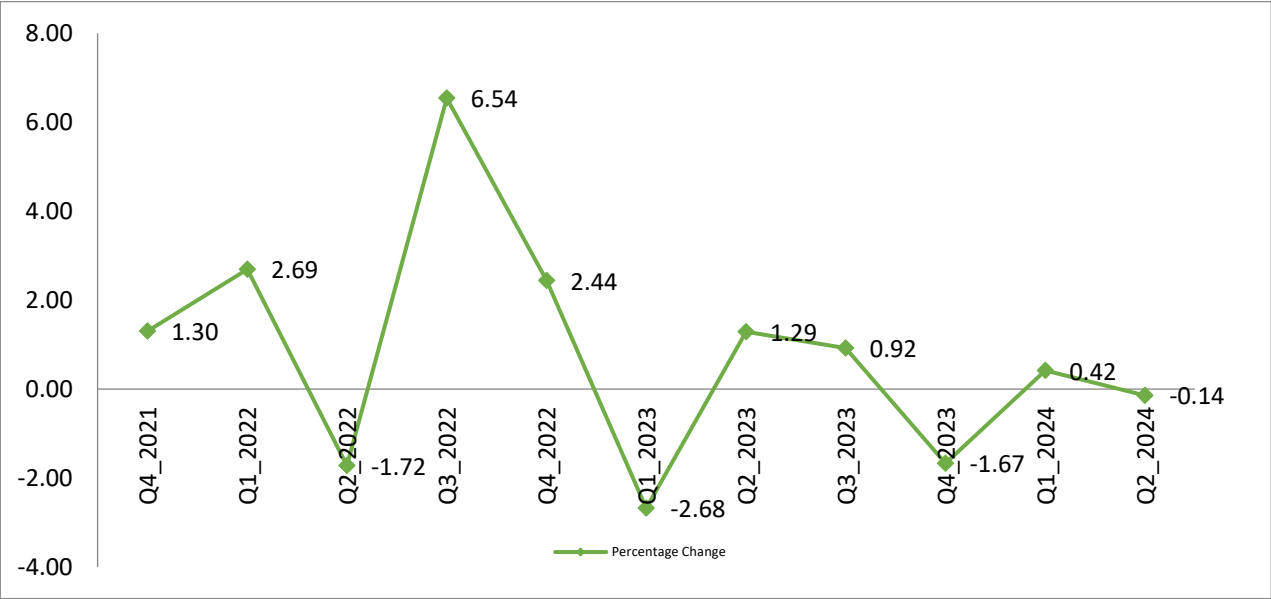

**Figure 2: Trend in Percentage Change in PPI (December 2021- June, 2024)**

**Source:** Office of the Chief Government Statistician

The overall Index in Mining & Quarrying and Manufacturing presented shows that the price of goods in ex-factory or ex- mining have been change irregularly from December quarter 2021 to June quarter 2024.

**Figure 3: Trend of PPI in Manufacturing and Mining (Percentage Change December 2021- June 2024)**

**Source:** Office of the Chief Government Statistician

Figure 3 shows the average Monthly percentage change in PPI in Manufacturing and Mining from December 2021 to June 2024. It shows that in June 2024 PPI were decreased by 0.14 percent. This was mainly attributed due to the decrease in the production price of manufacturing of food products.

## **Explanatory notes**

### **Brief Explanation of Producer Price Indexes**

The Producer Price Index (PPI) is a family of indexes that measures the quarterly average change over time in prices of goods produced by Manufacturing and Mining Industries. PPIs measure price change from the perspective of the seller. This contrasts with other measures, such as the Consumer Price Index (CPI). CPIs measure price change from the purchaser's perspective. The pricing point is ex-factory or ex-mining and excludes trade and transport margin and taxes. The PPI can be used as an economic indicator of inflation, as an escalator in contracts and as a deflator in the calculation of the national accounts.

OCGS publishes PPI data for Mining and Manufacturing, and it will continue to be published quarterly. The establishments are classified according to ISIC rev. 4; and the classification is determined by their main output.

The year-on-year rate of change is given by the percentage change in the index of the relevant month of the current year compared with the index of the same month in the previous year.

An initial PPI was compiled on a reference base of September quarter 2011 and with weights derived from the 2008 Census of Industrial Production (CIP). The index has since been rebased to June quarter 2013 and weights derived from 2012 CIP.

In this publication, the rebased series have been linked to the initial index at the Division and Section level of the International Standard Industrial Classification (ISIC) rev 4, and for the total PPI, at June quarter 2013. Continuous indices are presented for the period September quarter 2011 to June quarter 2013. It should be noted that indices for two of the divisions contained in the new index were not included in the initial index; indices for these divisions start with June quarter 2013.

### **Price Collection**

In the new PPI, Prices are collected from 34 establishments in Zanzibar, nine from Pemba and twenty-five from Unguja. A sample of five establishments was selected to represent quarrying and 29 for manufacturing making 34 establishments.

The formula used in the PPI calculation is the geometric modified Laspeyres.
