

REVOLUTIONARY GOVERNMENT OF ZANZIBAR

OFFICE OF CHIEF GOVERNMENT STATISTICIAN

## **Quarterly National Accounts Release**

**Revised Fourth Quarter (Oct – Dec), 2013**

OFFICE OF CHIEF GOVERNMENT STATISTICIAN

ZANZIBAR.

**February, 2014**

## **Forward.**

This Fourth Quarter report presents the analysis of Quarterly National Accounts (QNA) estimate in summary form. Brief description of estimation of GDP on Agriculture, Fishing, Industry, Services, Whole Sale and Retail Trade, Hotel and Restaurants, Transport and Communication, Financial Intermediation, Public Administration, Education, Other services and Taxes and Subsidies has been presented.

The Quarterly National Accounts provide the quarterly estimation of Gross Domestic Product (GDP) at constant prices for each economic activity which can serve a wider range of purposes. These time series results are essential for planning on the economy development, monitoring and evaluation of sound economic programs on a short term basis.

The National Accounts form a comprehensive framework within which economic and social data can be presented in a coherent, consistent manner. In the mean time, the estimates of National Accounts of Zanzibar developed into quarterly series and cover the period of 2001 to fourth quarter of 2013.

The Office of Chief Government Statistician (OCGS) in collaboration with various line Ministries engage on data collection process as well as compilation. It is our belief that the quarterly estimation of GDP is necessary input which enabling to put in places the environment for national development and improves the ability of government to formulate appropriate policies, manage the economic and social development process and monitor improvements of the living standards of the people.

The Office of Chief Government Statistician invite comments and suggestions for improvement on the report and enter process of quarterly GDP estimates, and should be send to the address below.

## **Acknowledgments**

The need for Quarterly National Accounts (QNA) has gained high priority in recent years with the broad objective of measuring the short-term economic performance. This report is the fourth series of the QNA estimates released by the OCGS for the year 2013. The comprehensive set of national accounts tables are given by the industrial economic activities as recommended by the 1993 System of National Accounts (SNA – 1993).

The compilation of this report was undertaken under the supervision of Mr. Abdul Ramadhan Abeid; Acting Head of Economic Statistics Section. The National Accounts Statistics Section member of staff involved in this assignment are Messrs Khalid Chum; Manager of National Accounts Unit, Fadhil A. Hassan, Bakari K. Makame, Faida Saleh, Hamisa S. Faki, Fahima M. Issa and Suleiman A. Hamad; particularly their dedication and efforts they put into this piece of work is highly appreciated.

The success on production of this report was mainly due to the timely supply of the required input indicators solely provided by the member of staff from all statistics unit in the OCGS. The office would wish to thank for their vital contributions and for the role they played which enable to release this quarterly report in timely manner.

The data sources from both private and public sectors also deserves special thanks for valuable efforts on supplied inputs; acknowledgements also go to the many individuals who helped in collection and processing of the data. It is only through their diligence that we have been able to produce this valuable report.

## Fourth Quarter National Accounts Analysis in Brief

### 1.0 Introduction

National Accounts data provide the most comprehensive overview of the country's economic performance and the status of the existing of developments in the national economy. In recent years quarterly national accounts have seen a substantial evolution and emerge a useful input for monitoring and evaluating the country economic performance inform monetary policy decisions in short term basis.

The compilation of Zanzibar Quarterly National Accounts focuses on the quarterly constant GDP estimates, also it compiled in line with the annual estimates in terms of its methodology as well as the input indicators used for mostly all industrial activities for which reliable and quick related data are available. Since key statistical data on the relevant quarter will necessarily take some time to collect, revisions will have to be made more frequently, accordingly.

The purpose of this report is to summarize the results of the quarterly estimation of Gross Domestic Product (GDP) for the Fourth quarter of 2013 which comprise of the month of October to December 2013. The result presented in this report is useful to a wider range of data users including the compilers of annual national accounts estimates. In the mean time, the reports focus on comprehensive estimates for the constant GDP for each economic activity.

### 1.1 The GDP Growth Rate increased to 7.8 Per cent in Fourth Quarter 2013

Zanzibar Gross Domestic Product (GDP) increased by 7.8 percent in the Fourth quarter (Q4) of 2013 compared to growth of 5.3 per cent observed in the same quarter 2012 (figure 1).

The results revealed that the increase of the rate of 7.8 percent was mainly associated with the significant rise in Hotel and Restaurants, Mining and Quarry, Manufacturing, Fishing and Other services (Table 3.0)

Other economic activities which show a remarkable growth are Agriculture, Electricity and Construction,

Figure 1: GDP Growth Rates for Fourth Quarter 2009 to 2013

## 2.0 Comparative Analysis between the Fourth Quarters of 2012 and 2013

The GDP growth rates of the economic activities in quarterly basis are presented in table 3.0, while the GDP at constant prices are presented in table 2.0.

### 2.1 Agriculture

The analysis of the GDP at constant prices for agriculture sectors for the Fourth quarter of 2012 and 2013 presented in figure 2 cover three main sub sectors namely crops activities, livestock sectors and forestry and hunting economic activities.

Table 3.0 indicates that the percentage change of agriculture inclined by

8.8 per cent in the Fourth quarter of 2013 compared with incline of 6.4 percent recorded in corresponding quarter of 2012.

Figure 2: Value Added for Agriculture Sector Fourth Quarter 2013

### 2.2 Fishing

The GDP for fishing activities highly increased by 8.4 in the Fourth quarter of 2013 compared to a decline of 15.6 per cent registered in Fourth quarter of 2012.

The increase of GDP growth for fishing was mainly due to the slight increase of a volume of fish catches from 6,884 tons recorded in Fourth quarter of 2012 to 7,460 tons in same quarter of 2013 (Figure 3).

Figure 3: Quantity (tons) of Fish Catch Fourth Quarter 2012 - 2013

## 2.3 Industry

The industry activities include Mining and Quarrying products, Manufacturing activities, Electricity, gas, water supply and Construction. Figure 4 presents the results of percentage changes of manufacturing activities, electricity and construction activities.

The gross value added of manufacturing activities is estimated by applying quarterly volume of production of manufacturing goods. Manufacturing sector increased by 4.9 per cent in the Fourth quarter of 2013 compared to a decline of 8.3 percent reported in the same quarter of 2012.

The rate of incline of manufacturing activities in Fourth quarter 2013 was mainly due to the incline on production of the volume for soft drinks from 2,197 litres recorded in Fourth quarter of 2012 to 2,252 litres reported in Fourth quarter of 2013 which is an increase of 2.0 per cent.

The Mining and Quarrying activities grew by 14.7 percent in the Fourth quarter of 2013 which is higher as compared to the decline of 1.7 percent recorded in the same quarter of 2012.

The quarterly Value Added at constant prices for Electricity, gas and water compiled by using the monthly quantity of electricity distribution and annual figure of water are distributed across the quarters. Electricity and related sectors grew by 4.9 percent in the Fourth quarter of 2013 which is higher as compared to the growth of 3.8 percent that was recorded in the same quarter of 2012.

The GDP of construction activities increased by 14.1 percent in the Fourth quarter 2013 which is higher compared to decline of 7.6 percent recorded in the same quarter in 2012.

Figure 4: Percentage Growth of Manufacturing, Electricity and Construction Industries

## 2.4 Services

The Service Industry includes wholesale and retail trade and repair, hotel and restaurant, transport and communication, financial intermediation, real estate, public administration, education, health and other social and community services.

### 2.4.1 Wholesale and Retail Trade

The economic activities are estimated using imports from the rest of the world as well as items imported from Tanzania Mainland. The estimates of marketed on domestic production are also included.

Wholesale and Retail Trade increased by 1.3 per cent in the Fourth quarter of 2013 compared to 7.8 percent growth in the corresponding quarter of 2012.

### 2.4.2 Hotel and Restaurants

The quarterly GDP growth of hotels and restaurants for both 2012 and 2013 are presented in Figure 6. The results indicate that in the Fourth quarter of 2013 the sector inclined by 19.3 percent as compared to decline of 4.5 reported in similar quarter of 2012. This increase may be associated with the increase on number of tourists' arrivals from 45,676 in 2012 to 55,322 in 2013.

### 2.4.3 Transport and Communication

The transport activity comprises of land, air and sea transports while the communication includes telecommunication services.

Transport and Communication activities for Fourth quarter 2013 increased by 10.4 percent which is lower compared to increase of 18.1 percent growth of the same quarter 2012.

This increase of growth rate may be due to increase on sales of air times in mobile companies between referenced quarters.

**Figure 5: Percentage Growth of Whole Sales and Retail Trade Fourth Quarter 2009 – 2013**

**Figure 6: Number of Tourists Arrival in Zanzibar Fourth Quarter 2012 – 2013**

#### 2.4.4 Financial Intermediation

This economic industry includes banking activities, insurance and bureau de change. The compilation of quarterly value added is generated using deposit and loan as indicators.

Financial intermediation registered a decline of 2.0 percent in the Fourth quarter of 2013 compared to growth of 16.1 percent recorded in the corresponding quarter of 2012.

Figure 7: Trends of Deposits and Loans for Fourth Quarter 2009 – 2013

#### 2.4.5 Public Administration

The quarterly estimate of Value Added for public administration has been calculated based on the salary and wage trends in the public sector. The GDP growth rate of Public administration sector for the Fourth quarter 2013 has increased by 2.4 percent compared to 13.1 percent growth observed in the same quarter of 2012.

Figure 8: Percentage Growth of Public Administration Fourth Quarter 2009 – 2013

#### 2.4.6 Education

The GDP growth rate of education inclined by 4.3 percent in Fourth quarter 2013 compared to a growth of 3.5 percent recorded in the similar quarter of 2012.

This may be due to increase of number of student's enrolment observed at primary and secondary schools and tertiary for both Government and Private.

#### 2.4.7 Health and Other Social Services

The GDP growth rate of these activities increased by 19.7 percent in the Fourth quarter of 2013 compared to growth of 5.9 percent observed in the same quarter of 2012.
