Glossary

- **Introduction**

The Hotel Producer Price Index (PPI) covers prices of Accommodations, Food, Beverages and Other Hotel Services. The index measures the quarter-to-quarter changes in prices of goods and services produced in Hotels. The Index is used for economic policy and analysis purposes and to assist in compilation of national accounts volume estimates.

- **Definition**

- **Standard room:** This is an accommodation of lower price and lesser quality. This category usually means the most basic room type offered by the hotel. It has basic, standard amenities and furnishings.
- **Deluxe room:** A room with moderately priced qualities and have a few more features than Standard room. A deluxe room is a lower category than a Superior
- **Superior room:** Is an accommodation of more comfortable or has better amenities than Standard room and deluxe rooms.
- **Sea View room:** A room is on the side of a building and you have a full view down the beach and can see the sea
- **Villa room:** A special form of accommodation which can be found in some resort hotels. It is a kind of stand-alone house which gives contains not only extra privacy and space to hotel guests but also fully equipped villa bedrooms and a living room.
- **Suite room:** A Suite room is usually two or more rooms. A bedroom and a living or sitting room, with a door that closes between them.
- **Communication.** This comprises of price of internet and Telephone services in the hotels.
- **A Price Collection**

The seventeen Hotels are selected to provide the information about the changes in prices of goods and services produced in Hotels. The prices are collected on 15th of each month and comprise of 96 quotations picked to make PPI basket.

The computation of indices at elementary level based on geometric mean of the price relative while at higher level the Laspeyres formula was used to compute the aggregate indices.

- **New Methodology used**

In the previous methodology, the price of accommodation were categorized into five grouped points *A(0 - 149,000TZS)*, *B(150,000 - 249,000TZS)*, *C(250,000 - 349,000TZS)*, *D(350,000 - 449,000TZS)*, *E(450,000 and above)* and Full Board (Holiday Package). Also, the Full Board Package consisted with more than two third (64.3 percent) of total weight.

The new methodology does not regard the prices of accommodation to determine the average prices. The average prices of accommodation items are categorized based on the types of Rooms. These are Standard Rooms, Deluxe Rooms, Superior Rooms, Sea View Rooms, Villa Rooms and Suite Rooms. Also, the Foods, Beverage and Other Hotel services are further divided into lower level of indices (Commodity Indices).
